

Pacesetter 990

A Mild Acid Fountain Solution for a high quality Cold Set Printers

FEATURES & BENEFITS

- **Faster Restarts = lower newsprint and ink waste**
- **More latitude balancing ink an water**
- **FOGRA Approved**
- **Brighter colors and sharper half tones**
- **Control bacterial growth**
- **Improved quality**

TECHNICAL DATA

V.O.C.'s	3%
Raw PH	3.6
Dosage	2.0 to 3.0 oz. / gal
Conductivity	500 micromhos/oz.

Product Description

➤ Pacesetter 990 is a uniquely blended revolutionary Mild Acid Fountain Solution. This formulation, with a combination of special wetting agents and natural Gum Arabic, provides your press operators with the ability to greatly reduce water and ink settings. Pacesetter 990 insures faster restarts, lowering your waste. Printing with Pacesetter 990 Allows for the reproduction of sharper half tones and brighter colors.

USE INSTRUCTIONS

➤ A clean re-circulation system is recommended when a new fountain solution is being tested. Based on the specific dampening needs you require; the recommended stating concentration of Pacesetter 990 is between 2.0 and 3.0 oz. per gallon. The conductivity of the solution should be between 1250 – 1500 micromhos over the initial conductivity of your water. The pH of the solution should be between 4.75 and 5.25. Solution pH depends on the pH of your water.
