

Pacesetter 820 G

Neutral Fountain Solution for Newspaper Printers

FEATURES & BENEFITS

- New technology provides faster restarts
- Reduced ink and water settings
- Lower waste
- Brighter colors, sharper half tones
- Improved print quality!
- No V.O.C.'s

TECHNICAL DATA

V.O.C.'s	0.0 lbs. / gallon
Dosage	2.0 oz. / gallon
Conductivity	600 micromhos per oz.

USE INSTRUCTIONS

The recommended starting concentration is 2.0 ounces per gallon to achieve a conductivity 1200 micromhos over the initial conductivity of your water.

Adjust the dosage to obtain optimal press performance

A clean re-circulation system is recommended when a new fountain solution is being tested.
